

8.0 Recommendation

This Action Memorandum documents the decision to implement the selected removal action for Site 8, at Beale AFB. The selected action was developed in accordance with CERCLA as amended, and is not inconsistent with the National Contingency Plan. Conditions at the site met the National Contingency Plan Section 300.415(b)(2) criteria for a removal action. This decision is supported by the administrative record for the site. SVE and bioventing are the selected removal action for the following reasons:

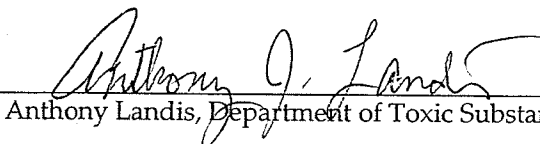

- The removal action will effectively protect human health and the environment by minimizing or preventing further migration of contaminants to groundwater
- Considering the benefits expected, the removal action is cost-effective to implement
